

MicroPro®

TOP REASONS WHY MICROPRO®

1. Long term field testing shows that MicroPro® treated timber provides effective protection against fungal decay and termite attack.
2. First Timber Treatment Process to Receive EPP Status. The Osmose® MicroPro technology is the first treated timber process to be EPP (Environmentally Preferable Product) certified by Scientific Certification Systems based on a Life Cycle Assessment.
3. Lighter, more natural timber appearance.
4. Improved painting and staining qualities.
5. Better corrosion resistance for code-approved fasteners and hardware.
6. End uses include interior and exterior, above ground and ground contact.
7. Compatible with MicroShades®, an innovative micronised pigment colour system.
8. Treated Timber Guarantee.*
9. Approved for aluminium contact.**
10. Approved APVMA, TUMA QLD and TMA NSW.
