

# Process Control System

Have greater control over your operation!

- Better manage your treatment costs
  - Produce management reports
- Interface with your accounting system

Designed and developed by Osmose engineers, the Osmose Process Control System (PCS) has been designed to meet the requirements of customers who demand the highest level of process control and information management.

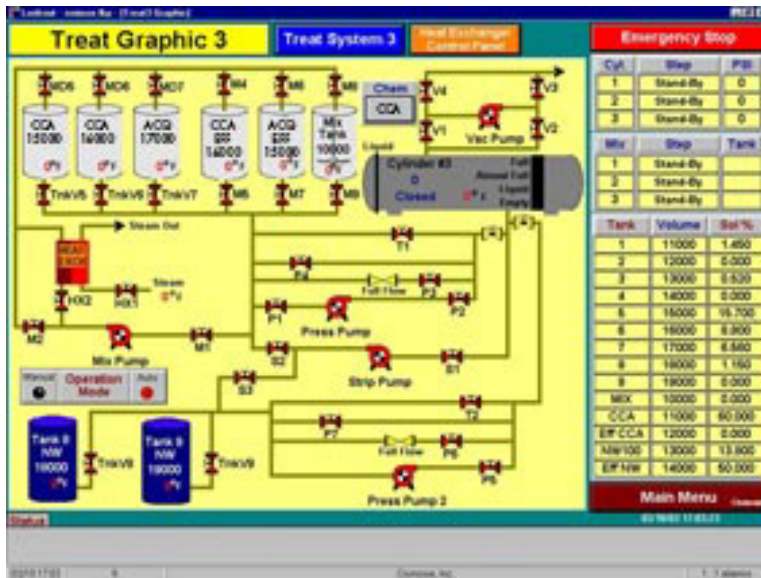

## PCS Key Features

- The Osmose PCS can be fully customised to suit your unique operation
- Full automation or manual override
- Detailed charge by charge information including reconciliations
- Detailed process information
- Interface with inventory control and accounting systems
- Security and access protocols
- PCS can manage up to three treating cylinders simultaneously
- 24 hour phone support and remote log-in
- Flexible system allows new formulations and or process cycles to be added or modified at any time
- Automated backup system
- Data search function

**Osmose PCS** is suitable for use with all Osmose high & low pressure preservative systems including:

Example of a treatment charge in progress

Example of a charge sheet

- **Only top quality components...**  
are used to automate your treatment plant.
- **Two PC's ...**  
are used in a network, in case one PC fails the other one can continue to run your plant.
- **Uninterrupted Power Supply (UPS) and surge protection ...**  
is always installed to minimise interruption.
- **User friendly ...**  
and easy to learn interface.
- **Touch screens ...**  
are optional.
- **Safety system ...**  
logs all plant actions and alarms.
- **Emergency notification ...**  
with telephone or paging system.
- **Automatic mix system ...**  
calculates chemical additions – then controls the additions with a single button click.
- **Tank circulation can be automated ...**  
can be left running as it will pause when the tank is in use for treating.

**Training:**  
On-site training will be supplied by your Osmose® Territory Manager. Back-up and support is just a phone call away as most questions should be able to be dealt with over the phone. Our representatives are also able to provide on-site assistance during our service calls.
