

Why use PROTIM® Solignum® Timber Care

PROTIM® Solignum® Timber Care Product Information

PROTIM® Solignum® Timber Care

- 
PROVEN TIMBER PRESERVATIVE RANGE
 Trusted and asked for by name by timber specialists, building trades and DIYers as a complete solution for all outdoor timber projects to enhance the aesthetics and durability of all timber.
- 
RECOMMENDED BY MAJOR TIMBER PRODUCERS' WARRANTIES
 Timber producers and wholesalers recommend in their warranties the re-sealing and re-treating of "cut ends" for all treated pine.
- 
PROTECTS TIMBER FROM INSECT ATTACK, FUNGAL DECAY AND WEATHERING
 While staining or painting provide an external barrier, Timber Care preservatives (CN/Reseal™/XJ™) penetrate into the wood providing protection from the natural enemies of timber – sunlight, water, fungal decay and/or insects. (See chart for more information). All products are registered with the APVMA (Australian Pesticides and Veterinary Medicines Authority).
- 
BETTER COVERAGE MEANS BETTER RESULTS IN LESS TIME
 Look for Protim® Solignum® Timber Care, manufactured by Osmose Australia – the world leaders in timber preservation products and application technologies - for products that provide the best results and proven durability.

Osmose has been a producer of timber preservatives since 1934 and is the world's leading manufacturer and supplier of timber preservatives and associated technologies.

Osmose strongly recommends that all the information displayed on the product labels and elsewhere, be read and understood before use.

PROTIM[®] Solignum[®] Timber Care Product Range

Product Range		Treatment Purpose	Suggested Applications	Application Methods	 IN GROUND	 ABOVE GROUND	 WATER REPELLENT	 UV PROTECT	 CLEAR FINISH	 COLOURED FINISH
RESEAL										
RESEAL Timber Protective		End-sealing and re-treatment of CCA/ACQ [®] treated pine. Protects from borers, termites and fungal decay.	All end-cuts (e.g. retaining walls, decks, balustrades).	 						
XJ[™] Timber Protective Clear		General preservative for all outdoor timber requiring a clear finish. Protects from fungal decay, borers and termites. Reseals 'cut ends' of LOSP and 'blue' pine framing.	Window frames, external doors, gates, fences, handrails, outdoor furniture.							
PROTECT										
CN Timber Oil Timber Protective		Heavy duty general purpose preservative for hardwoods & softwoods to protect against fungal decay and borers.	Fences, landscaping, wharves, bridges, engineered structures.							
CN Emulsion Timber Protective		Super heavy duty protection from fungal decay of timber and timber structures, particularly when in ground contact.	Poles, bolt holes, interfaces and joints in high hazard situations.	Spread by spatula						
FINISH										
Raincoat[™] - Clear - UV Plus - Environment (green)		A water repellent finish for treated and untreated timber, reducing checking, splitting or movement. Penetrates to protect and enhance the beauty of all timber*.	Decks, fences, cladding, furniture, lattice, windows, pergolas and any exterior structures.	 						

Osmose recommends reading product label instructions before use in regard to application, safety and storage. Re-application may be required to maintain product effectiveness; particularly in high hazard situations.
* Osmose recommends the use of lighter colour paints or stains to provide a more durable result. This product is directly compatible with other alkyd or oil based paints and stains.
When using acrylic or other water-based products, first coat with an oil based primer.
